Jones Residence/Redwood City, California, photos by Mark Trousdale

Kaplan Architects is an award winning architectural firm with over 30 years' experience doing projects throughout the Bay Area and beyond. Kaplan Architects has extensive experience in custom home remodels and new home design. The approach to each project involves listening to the clients' needs and designing solutions to meet their specific requirements. The office consistently produces designs that are functional and have a clean, timeless character, not solely based on the fashion of the day.

This deck is one of several outdoor areas connected to the main living space of the Jones Residence, a new 4,000 square foot home in the hills overlooking Silicon Valley. The detail photo shows the main entry.

OPPOSITE: The family room of the Jones Residence is a multipurpose space. It connects to the main living area upstairs and to a large patio terrace with a fully equipped outdoor kitchen.
